

LED DMX DANCE FLOOR

The LED FLOOR offers endless color possibilities to modify your surroundings. With minimized heat production, the LED FLOOR has the flexibility for numerous types of applications such as architectural/ retail spaces, stage, productions, night clubs, dance floors, and much more. The combination of Red, Green and Blue LEDs offers a tremendous range of colors with smooth transitions from one color to the next. This unit has 3 operating modes Stand Alone, Master/ Slave or DMX Control. With 3 dmx control modes the unit provides flexibility for controlling the color mixing and patterns creations for added creativity.
